We embrace philanthropic partners equally committed to expanding the intersections and understanding among cultures. Donate. The China-Cornell-Oxford Project—the “China-Oxford-Cornell Study on Dietary, Lifestyle and Disease Mortality Characteristics in 65 Rural Chinese Counties,” referred to in the book as “the China Study”—was a comprehensive study of dietary and lifestyle factors associated with disease mortality in China. The study compared the health consequences of diets rich in animal-based foods to diets rich in plant-based foods among people who were genetically similar. [10]. The idea for
