NOSEY MRS. RAT

Author: Jeffrey Allen
Illustrator: James Marshall
Publisher: Viking

THEME:
Being a skilled observer is a valuable tool, but snoopiness is annoying.

PROGRAM SUMMARY:
Mrs. Rat makes a career out of spying on her neighbors, but the tables are unexpectedly turned on her.

Being a skilled observer is a valuable tool. Primatologist Dr. Jane Goodall explains how her own curiosity helped her become a leading scientist in the study of primates. A nature/wildlife photographer shows viewers how observation and scrutiny are important tricks of the trade in the world of photography.

TOPICS FOR DISCUSSION:
Discuss the feelings of Mrs. Rat’s neighbors about her spying. What does it mean to “respect someone’s privacy”?

Discuss with the students how they felt about Brewster Blackstone’s solution to the problem of Mrs. Rat’s snoopy behavior. Mrs. Rat was “humiliated.” What does it mean to be humiliated? Invite students to describe an occasion when they have felt that way. Brainstorm other possible solutions for handling the problem of Mrs. Rat’s snooping.

Mrs. Rat described her snooping as her “hobby.” Have students discuss hobbies that they have or might have that are more acceptable to other people.

Discuss what it means to be a “neighbor.” What makes a good one?

CURRICULUM EXTENSION ACTIVITIES:
Have the class make a list of all the ways that Mrs. Rat spied on others.

Have students brainstorm a list of occupations in which skilled observation is important.

Bring some sets of binoculars into the classroom, so students can look through them. As they view the same scene with and without the binoculars, discuss the differences in what they see.

Invite a student’s parent or friend who enjoys nature photography into the classroom to show some of his/her photos and share with the children important considerations in photographing nature.

Assign each student a 3-foot square of the schoolyard or other nearby grassy area. Have students observe their spaces for as many details as they can find and draw their space. They should note such features as rocks, plants, insects, twigs, seeds, etc. Discuss the importance of only observing their space, rather than disturbing it.

Brainstorm what students know about “primates.” If this term is unfamiliar, work with a more familiar concept, such as “monkey” or “ape.” (The primate family includes lemurs, monkeys, apes, galagos, and humans.) Make a list of types of primates with which students are familiar. Display the list in the classroom so that they can add new names as they learn more about these animals. Working with partners, have students use print and multimedia resources to research members of the primate family.

Have the students make a class “peep-hole” book. To make a page for the book, they cut a picture from a magazine and attach it to the back of a piece of construction paper. They need to identify what part of the picture they want to reveal through a “window” in the construction paper; then cut out the window. When the book is finished, share it with the whole class and have students guess what each picture is by looking through the window. Tana Hoban’s Look! Look! Look! (Greenwillow) might give them some ideas for their book.

Using a variety of scrap materials, have children create disguises for themselves.

Have students locate other books illustrated by James Marshall and note how often he uses animals in his illustrations, but gives them human qualities. Discuss possible reasons for his use of animals as “people.”

ABOUT THE AUTHOR:
Jeffrey Allen had an established career in journalism until he met James Marshall and the two of them created a humorous story about a telephone operator who was a duck. That story was published as Mary Alice, Operator Number Nine, the first of several collaborations between Allen and Marshall.
ABOUT THE ILLUSTRATOR:
Best known for his series of books featuring the popular characters George and Martha, Viola Swamp, and the Stupids, James Marshall's cartoon style of art and his subtle use of humorous detail have made his books immediately recognizable to children. James Marshall’s work has been featured on previous Reading Rainbow programs: *Fox on the Job, Miss Nelson Is Back, The Piggy in the Puddle, Space Case*, and *Three by the Sea*.

BOOKS REVIEWED BY CHILDREN:
MOUSE VIEWS: WHAT THE CLASS PET SAW
by Bruce McMillan (Holiday House)

THE 13TH CLUE
by Ann Jonas (William Morrow)

TIGER
by Judy Allen, illus. by Tudor Humphries (Candlewick Press)

SUPPLEMENTARY BOOKLIST:
MY CAMERA

by Shelley Rotner and Ken Kreisler (Macmillan)

EVERYDAY MYSTERIES
by Jerome Wexler (Dutton)

LOOK CLOSER!
"Nosey Mrs. Rat" is a household name! Wonderfully written - great story. I actually had a hard time getting through it without falling over in laughter! Hahaha!!

This is one of our favorite books of all time. Nosey Mrs. Rat is the classic busybody. We always quote her "Can you really afford that expensive brand?" when we are shopping! You just can't miss with James Marshall. Mrs Crocombe's Recipes. More Pages. Victorian Stable Yard. Seasonal Garden Highlights. Mrs Crocombe's Recipes. Mrs Crocombe's Recipes.

Freeze in an ice cream maker, or use ice and salt packed around a freezing pot as Mrs Crocombe would have done. You can also add a little green food colouring. Although unusual to our modern tastes, cucumber was frequently cooked in the past, and this recipe is one of the best.

Book Review of Mrs. Frisby and the Rats of NIMH

Here is a quick book review for you Shmoopsters, in case you're in the market for a critical take. Video. Rat Staring Contest with Creepy Background Music

Here's your chance to watch rats being weird without actually being around rats. Think they can read? Who Says We Can't Be Friends? Unusual Animal Friends

Hopefully this book reminded you how you love interspecies friendships. But just in case it didn't, this montage oughta do the trick.
