Yudice, George
What is a third world country? Recently, third world countries can be defined by high poverty rates, economic instability, and lack of basic human resources compared to the rest of the world. The term “Third World countries” was first used during the Cold War. This term was used to describe countries that were not aligned with the Communist Bloc or NATO or that were neutral. This term was first used to categorize countries into three groups based on their politics and economics. The Philippines is historically a Third World country and currently a developing country. The GDP per capita is low and the infant mortality rate is high. 1985. Villagers, Villages, and the State in Modern Tanzania. Cambridge African Monographs, no. 4. Cambridge: African Studies Centre. Amory, D. 1994. “The Politics of Identity on Zanzibar.” Speech on corruption delivered at the opening of a seminar organized by the Danish Association for International Cooperation (MSâ€™TCDC) at Mwengoâ€™, Usaâ€™river, Arusha, 14 November 1995.
