Chicago Style Bibliography

The following are some examples of citation styles for various sources. For complete information on citing sources in Chicago style, see the *The Chicago Manual of Style*, 16th Edition or *The Bedford Handbook*, 8th ed.

The Chicago style utilizes footnotes or endnotes for in-text citations and a bibliography page as a reference page. The bibliography is an alphabetical listing of the sources that appear in your notes. However, personal interviews and sources consulted but not included in the paper should not be included in the bibliography. Alphabetizing is based on the first letter of the author’s last name, or, if there is no author, the entry should be alphabetized by the first word of the title, excluding the articles “A,” “An,” or “The.” Each entry should begin at the left margin. If the entry goes on to two or more lines, the subsequent lines should be indented half an inch, creating a hanging indent. Each entry should be single-spaced, with an extra line of space between entries. Please see included page numbers for further clarification on each entry.

**Book with Single Author (CMS 695; BH 701):**

**Book with More than Three Authors (CMS 696; BH 702):**

**Edited or compiled books or anthologies (CMS 699-700, 708; BH 704):**

**Journal Article (CMS 731-732; BH 706):**

**Journal Article from an Electronic Database (CMS 733-734; BH 707-708):**
*Accessed dates are optional unless required by professor*

**Material from a Web Site (CMS 752-754; BH 709-711):**
*Accessed dates are optional unless required by professor:*
Bibliography

A simple content authoring environment for CMS-free websites. Type: Git-based. Open-source headless CMS without compromising on the authoring experience. No more form-based content management. Powerful APIs to consume from any client like React or Angular. AEM provides headless content management and delivery capabilities for both developers and marketers for channel agnostic content authoring and delivery to any end point. The framework takes you beyond server-side HTML rendering, with support for headless CMS capabilities, like HTTP APIs for content delivery below the page level to any channel and JavaScript framework-based content presentation. With Experience Manager Sites, you have the flexibility to develop, manage, and provide ongoing support for content and experiences across traditional, hybrid headless, and pure headless content delivery. Library CMS is our vision of simple and powerful CMS for book management. We will do our best to do it more powerful ...
