Kevin Lawton: “The Crowdfunding Revolution”

Feb. 9 2011, 5:45-7:30pm, LKSC 120

Registration is required! Visit our website: aims.stanford.edu

Kevin Lawton is a prolific blog contributor. He contributes to SeekingAlpha, VentureBeat, the Huffington Post. He is a trend-caster and visionary blogger at the intersection of business and technology. Kevin is the author of “The Crowdfunding Revolution”, a book with a deep and broad look at the rationale and rise of crowdfunding, the broad landscape and a very visionary look into its future.

Kevin has kindly agreed to share his valuable time and insights on the upcoming revolution of crowdfunding. He will give us a broad look at the origin and the future of crowdfunding.

This event is co-sponsored by the School of Medicine Career Center (SoMCC) and the Stanford Career Development Center (CDC). AIMS operates in partnership with the SoMCC.

Refreshments will be served!
Dragon’s services include Crowdfunding and an API for manufacturing. Dragon has helped Pebble, Romotive, MakerBot, Sifteo, Orbotix and over 100 [...] Crowdfunding The Hardware Revolution. Josh Wolfe Former Contributor. Opinions expressed by Forbes Contributors are their own. The other method is equity crowdfunding, where investors pay to own a slice of a company. Tim Heasley, COO of Artesian Venture Partners which runs crowdfunding site VentureCrowd, said the current law in Australia meant only wholesale investors—those who earn at least $250,000 or have $2.5 million in assets—could participate in equity crowdfunding. The potential audience is estimated in the low hundreds of thousands in Australia. Capitalizing On Financial Innovation Part I: Preparing For The Crowdfunding Revolution. Since the passage of the overwhelmingly bipartisan Jumpstart Our Business Startups Act (the “JOBS Act”) on April 5, 2012, the curiosity of a revolutionary small business financing mechanism called, Crowdfunding (also referred to as Title III of the JOBS Act, “Crowdfund Investing” or “CrowdInvesting”), has intensified.
