LIST OF EXHIBITS xv
PREFACE xvii
USING THIS BOOK xix

I. INTRODUCTION 1
   Overview 1

I.A. MEASURING DEVELOPMENT 5
   Note I.A.1. The Evolution of Measures of Development 5
   Selection I.A.1. Why Are Services Cheaper in the Poor Countries? 13
     Comment I.A.1. The Productivity and Factor Proportions Explanations Again 17
   Selection I.A.2. Burden of Poverty 18
     Comment I.A.2. Capabilities and Entitlements 30

I.B. ECONOMIC PERFORMANCE OF LESS DEVELOPED COUNTRIES:
   THE RECENT PAST 35
   Selection I.B.1. The East Asian Miracle 36
   Selection I.B.2. East Asian Crisis: An Overview 42
   Selection I.B.3. Completing China’s Move to the Market 48
   Selection I.B.5. The Launching of the Reforms 58
   Selection I.B.6. Indian Economic Reforms: Background, Rationale,
     Achievements, and Future Prospects 61
     Note I.B.1. The Triumph of Laissez-Faire? 64
   Selection I.B.7. Explaining Africa’s Development Experiences 65

I.C. THE DISCIPLINE OF DEVELOPMENT ECONOMICS 69
   Note I.C.1. Evolution of Development Economics 69
     Comment I.C.1. Classical Growth Theory 72
     Comment I.C.2. Development Economics as a Special Subject 73
   Note I.C.2. New Endogenous Growth Theory 75
II. HISTORICAL PERSPECTIVE

Overview: The Division of the World

Selection II.1. The Spread of Economic Growth to the Third World: 1850–1980
Comment II.1. State-owned Enterprises and Privatization
Selection II.2. The Division of the World and the Factoral Terms of Trade
Note II.1. Why Not Export First?
Note II.2. The Lewis Model of the World Economy
Selection II.3. Agricultural Productivity, Comparative Advantage, and Economic Growth
Comment II.2. Income Elasticity of Demand for Food in the Matsuyama Model
Selection II.4. Income Distribution, Market Size, and Industrialization
Comment II.3. Minimum Market Size in the Murphy–Shleifer–Vishny Model
Selection II.5. Divergence, Big Time

III. SAVINGS AND INVESTMENT

Overview: Savings—The Engine of Growth?

Note III.1. The AK Model
Selection III.1. Is Fixed Investment the Key to Economic Growth?
Selection III.2. Interest Rates in the Organized Money Markets of Underdeveloped Countries and Interest Rates Outside the Organized Money Markets of Underdeveloped Countries
Selection III.3. Financial Liberalization in Retrospect: Interest Rate Policies in LDCs
Comment III.1. Financial Liberalization
Selection III.4. Financial Development and Economic Growth in Underdeveloped Countries
Selection III.5. Financial Development and Economic Growth: Views and Agenda
Selection III.6. Good Policy or Good Luck? Country Growth Performance and Temporary Shocks
Comment III.2. Policies Versus Shocks: A Closer Look

IV. INTERNATIONAL TRADE AND TECHNOLOGY TRANSFER

Overview

IV.A. TRADE

Selection IV.A.1. Natural Resource Abundance and Economic Growth
Note IV.A.1. Import-substituting Industrialization and the Infant-Industry Argument
Selection IV.A.2. Typology in Development Theory: Retrospective and Prospects
Selection IV.A.3. An Exposition and Exploration of Krueger’s Trade Model
Comment IV.A.1. Moving Up the Ladder and Changes in Relative Costs of Factors of Production
VI. MIGRATION AND THE URBAN INFORMAL SECTOR

Overview: The Evolving View of Urban Underemployment, the Informal Sector, and Their Connection with Rural-Urban Migration

Selection VI.1. Urban Growth in Developing Countries: A Demographic Reappraisal
Selection VI.2. Economic Development with Unlimited Supplies of Labor
Selection VI.3. A Model of Labor Migration and Urban Unemployment in Less Developed Countries
Note VI.1. The Lewis Versus the Harris–Todaro View of Underemployment in Less Developed Countries
Selection VI.4. Wage Spillover and Unemployment in a Wage-gap Economy: The Jamaican Case
Note VI.2. Econometric Studies of Migration
Selection VI.5. The Informal Sector
Selection VI.6. A Reassessment of Kenya’s Rural and Urban Informal Sector
Selection VI.8. The Role of the Informal Sector in the Migration Process: A Test of Probabilistic Migration Models and Labour Market Segmentation for India

VII. AGRICULTURE

Overview

VII.A. THE IMPORTANCE OF AGRICULTURE FOR ECONOMIC DEVELOPMENT
Selection VII.A.1. Development Strategy in a Limping World Economy
Note VII.A.1. Food, Hunger, Famine

VII.B. DESIGNING AN AGRICULTURAL STRATEGY
Selection VII.B.1. Some Theoretical Aspects of Agricultural Policies
Selection VII.B.2. Criteria for the Design of Agricultural Development Strategies
Comment VII.B.1. The Green Revolution
CONTENTS

Comment VII.B.2. Land Reform 346
Selection VII.B.3. The Agricultural Transformation 347
Note VII.B.1. Induced Technical and Institutional Change 350

VII.C. MICROECONOMICS OF THE RURAL SECTOR 352
Selection VII.C.1. The New Development Economics 352
Selection VII.C.3. The New Institutional Economics and Development Theory 359
Selection VII.C.4. Rural Credit Markets and Institutions in Developing Countries: Lessons for Policy Analysis from Practice and Modern Theory 361
Selection VII.C.5. A Survey of Agricultural Household Models: Recent Findings and Policy Implications 364
Comment VII.C.1. Supply Functions and Price Responsiveness 366

VII.D. AGRICULTURAL PRICING POLICY AND URBAN BIAS 368
Note VII.D.1. Agricultural Pricing Policy 368
Selection VII.D.1. Urban Bias 370
Comment VII.D.1. Rural–Urban Terms of Trade 373
Comment VII.D.2. The Rural–Urban Divide 373

VIII. INCOME DISTRIBUTION 375
Overview 375
Note VIII.1. Measurement of Income Inequality 379

VIII.A. THE IMPACT OF DEVELOPMENT ON INCOME DISTRIBUTION 382
Selection VIII.A.1. Economic Growth and Income Inequality 382
Selection VIII.A.2. Inequality, Poverty, and Development 387
Selection VIII.A.3. Growth and Income Distribution 391
Selection VIII.A.4. A Note on the U Hypothesis Relating Income Inequality and Economic Development 394
Selection VIII.A.5. Economic Development, Urban Underemployment, and Income Inequality 395
Comment VIII.A.1. The Informal Sector, Intraurban Inequality, and the Inverted U 399

VIII.B. THE IMPACT OF INCOME DISTRIBUTION ON DEVELOPMENT 401
Selection VIII.B.1. Distributive Politics and Economic Growth 401
Selection VIII.B.2. Income Distribution, Political Instability, and Investment 404
VIII.C. CASE STUDIES

Selection VIII.C.1. Economic Growth and Income Distribution in Taiwan, 1953–64
Selection VIII.C.2. Brazilian Size Distribution of Income

IX. POLITICAL ECONOMY

Overview

IX.A. THE (PROPER) ROLE OF THE STATE IN LESS DEVELOPED COUNTRIES

Selection IX.A.1. Public Policy and the Economics of Development
Comment IX.A.1. Development Planning
Comment IX.A.2. Governing the Market

IX.B. RENT SEEKING AND GOVERNMENT FAILURE

Note IX.B.1. What Are Rents?
Selection IX.B.1. The Political Economy of the Rent-Seeking Society
Comment IX.B.1. Complete Rent Dissipation Through Competitive Rent Seeking in the Harris–Todaro Model
Comment IX.B.2. The Relationship Between Rent Seeking and Corruption
Selection IX.B.2. Neoclassical Political Economy, the State, and Economic Development
Selection IX.B.3. India
Selection IX.B.4. Governments and Agricultural Markets in Africa
Selection IX.B.5. Africa’s Growth Tragedy: Policies and Ethnic Divisions

IX.C. STATE CAPACITY

Selection IX.C.1. Institutions and Economic Performance:
  Cross-Country Tests Using Alternative Institutional Measures
Selection IX.C.2. The State as Problem and Solution:
  Predation, Embedded Autonomy, and Structural Change
Selection IX.C.3. Taking Trade Policy Seriously:
  Export Subsidization as a Case Study in Policy Effectiveness
Selection IX.C.4. Bureaucratic Structure and Bureaucratic Performance in Less Developed Countries

X. DEVELOPMENT AND THE ENVIRONMENT

Overview: Environmental Problems in Less Versus More Developed Countries
Selection X.1. Development and the Environment
  Comment X.1. The “Environmental Kuznets Curve”
Selection X.2. North–South Trade and the Global Environment

APPENDIX: HOW TO READ A REGRESSION TABLE 561
INDEX OF SELECTION AUTHORS 567
INDEX 569
EXHIBITS

Exhibit I.A.1. Basic Indicators
Exhibit I.A.2. Exchange-Rate-Deviation Index in Relation to Real GDP per Capita,
  Thirty-four Countries, 1975.
Exhibit I.A.3. The Human Development Index
Exhibit I.A.4. Similar Income, Different Human Development, 1993
Exhibit I.A.5. Human Development Index Rankings
Exhibit I.B.1. Balance Sheet of Human Development—Developing Countries
Exhibit III.1. Economic and Social Indicators in Fast and Slow Growth Economies
Exhibit IV.A.1. Share of Primary Products in Merchandise Exports and Index of
  Export Concentration
Exhibit V.C.1. Health Indicators
Exhibit V.C.2. Life Expectancies and Health Expenditures in Selected Countries
Exhibit VI.1. Self-employment and Unpaid Family Workers Circa 1990
Exhibit VII.D.1. Rural and Urban Poverty in the 1980s
Exhibit IX.A.1. Market Failure and State Intervention
The economics of development is one of the most exciting subjects in social science. Why, two centuries after the Industrial Revolution, are poverty and its attendant ills so prevalent in most of the world? And what can be done about it? Nobel Prize–winning economist Robert Lucas wrote of the questions addressed by development economics, “Once one starts to think about them, it is hard to think about anything else” [“On the Mechanics of Economic Development,” Journal of Monetary Economics 22 (July 1988), p. 5].

Development economics is also a very frustrating subject. Unlike most areas within economics, there exists no consensus on what the student should know. Two scholars can with equal justification write two completely different textbooks.

The aim of this book is to convey as much of the excitement of development economics and as little of the frustration as possible. To this end we have avoided writing the ordinary type of textbook, instead culling the most insightful readings from the diffuse field of development and bringing them into conceptual order. By using this distinctive approach we allow for a variety of perspectives while keeping in sight the most important overarching themes. The section “Using This Book” (p. xix) describes our strategy of combining excerpted readings (“Selections”) with our own “Overviews,” “Notes,” “Comments,” and “Exhibits.”

After being responsible for the previous six editions of Leading Issues in Economic Development over the past 35 years, Professor Meier has now selected Professor Rauch to upgrade and modernize this seventh edition and to perpetuate subsequent editions. This edition is mainly Professor Rauch’s effort. It reflects his desire to strengthen the analytical and quantitative dimensions of development economics and to illuminate contemporary—and future—problems of development policymaking. In all, it provides fresh and serious attention to the interplay between development experience, changing views of economists, and policy.

While this seventh edition maintains the format of previous editions, the inclusion of a new author has brought many changes relative to the sixth edition:

- New chapters on income distribution and on development and the environment have been added while other chapters have been consolidated.
- Most of the Selections and Notes are new.
- The representation in the Selections of articles from leading professional journals has increased.
- The Selections make greater use of statistical analysis, and an Appendix, “How to Read a Regression Table,” has been added to ensure that these Selections are easily accessible to all readers.

We wish to express our appreciation to the authors and publishers who have granted permission to use excerpts from publications for which copyrights exist. Specific acknowledgment is given with each Selection. Some parts of the original versions of the excerpted materials have been omitted out of consideration for relevance and to avoid repetition. In some instances, tables and diagrams have been renumbered and the footnotes have been deleted or renumbered.

We would like to thank a number of extremely busy people who generously took time out to provide advice or to comment on portions of the manuscript: Richard Carson, Graham Elliott, Peter Evans, and Dani Rodrik. We would also like to acknowledge the valuable research assistance of Neville Francis, Timothy Kane, Paula Lindsay, and Donald McCubbin. James Rauch wishes to thank his wife, Doris
Bittar, for making room in her life for this book during its final months of preparation. Kenneth MacLeod has been a very helpful and patient editor. Finally, we are grateful to the entire profession of social scientists whose writings on development provide the foundation for this volume.
Instructors and students can use this book more like a main text or more like a supplementary reader. To facilitate the latter approach the contents have been designed to allow individual freedom of choice in deciding what chapters and Selections to read and in what sequence. If the former approach is taken, the organizational and thematic guidance of the chapter Overviews can be followed and the chapters can be read in numerical order.

The chapters include the following materials:

*Overviews:* These are introductory essays that show how the subsequent chapter materials fit together and elucidate one or more overarching themes. They sometimes contain ideas that are not explicitly presented by the other chapter materials.

*Selections:* These are the core of the book. They present a broad sample of the major contributions by scholars and practitioners on the central issues in economic development. Each Selection has been edited for the sake of brevity and to highlight the points of greatest relevance for the chapter in which it appears.

*Notes:* These serve two purposes. One is to expound important ideas that are extant in the literature but are not presented as clearly or simply as we would like. The other is to present more original material that complements the Selections.

*Comments:* Like the Notes, these serve two purposes. One is to clarify or expand upon the immediately preceding Selection. The other is to suggest additional readings on the subject of the immediately preceding Selection.

*Exhibits:* These are tables and charts that provide empirical illustrations and data on topics under discussion. Starting with Selection III.1, some Selections include regression tables. Readers without econometric training are urged to refer to the Appendix to get the most insight from these Selections.
INDEX

Acquired immune deficiency syndrome (AIDS), 257, 260
Adverse selection effect, 362
Afghanistan, 88, 91, 263, 536
Africa, 104. See also East Africa; North Africa; South Africa; Sub-Saharan Africa; West Africa; agriculture and, 97, 100, 333; divergence and, 115; economic environment in, 430; economic growth in, 84–85, 86–87, 89, 91, 92, 94; education in, 219, 225; environment and, 526, 528; health in, 258; industrialization and, 98, 99, 451–52; population of, 244; poverty in, 18; rural-urban migration in, 293, 294; state intervention in agricultural markets, 450–55; typology of development in, 170–74; unemployement in, 310; women in, 274, 275, 276, 281
Agency for Marginal Farmers and Agricultural Labour (MFAL), 447
Agricultural household models, 331, 346–66
